

Dear Sir/Madam

My name is Kwabena Ampah, I am a Ghanaian and I graduated in BSC Computer Science from the University of Cape Coast in Ghana. I am currently working with Union Systems Global as Backend and API Integrations Developer. My experience as a backend developer has expanded my knowledge base and the awareness of systems security on the internet. I have come to understand how everybody is not really safe over the internet and organizations putting measures into place to everyone safe. I now appreciate the international policies and protocols around security of all users on every system. My ultimate goal is to become an expert in problem solving, analyzing system and programming to solve problems facing my society and the world as a whole. I believe that advanced training in a graduate program of good quality will help me develop my dream and help my countries development.

As a highly motivated undergraduate in Computer Science at University of Cape Coast. Besides courses listed on my transcript, I did a lot of experiments in relation to these courses. I also learned about courses that are not found in my transcript: such as: Embedded systems. My research on embedded helped me when I was selected to be part of a few group of students to work on Arduino obstacle avoidance robot for the Computer Science and information department of the University of Cape Coast. Due to this my final year project was on embedded systems: automated line following robot using Arduino, a robot that moves on a predefined path. Due to my comprehensive specialized knowledge, I was appointed as the team leader of my group. I headed and engineered the whole project.

I am much eager to adopt and know new technologies. I am really enthusiastic to be considered for Australian Immigration. The good reputation of high-quality education, job and excellent standard of living have motivated me to submit an Expression of Interest for the Global Talent Visa Program.

I think it is our duty as people sharing life in this world to make our future better because the future is not only ours. Our grandchildren should be proud of us one day when they look back and find how hard we worked to make the world a better place. I believe my qualification and your needs would be an excellent fit. I will be happy to provide any further information or documents if required. I look forward to your positive response. Thank you for your time and consideration.

Yours faithfully,

Kwabena Ampah.
